ACCOUNTING POLICIES

for the year ended 31 December 2004

BASIS OF ACCOUNTING

These financial statements have been prepared in accordance with applicable Accounting Standards in the United Kingdom. A summary of the more important accounting policies, which have been applied consistently is set out below.

GOING CONCERN

The ultimate parent company's has undertaken to continue its financial support of the company to the extent of, and as long as there exists a deficiency of shareholders' funds, and for at least the next twelve months from the approval of the financial statements.

CONSOLIDATION OF GERMAN, SWEDISH AND DANISH BRANCH

For the purpose of reporting in these financial statements the profit and loss accounts, cash flows and balance sheets of the German, Swedish & Danish branches have been consolidated with those of the Head office operations which cover the UK and Ireland.

TURNOVER

Turnover represents the invoiced value, net of Value Added Tax, of goods sold and services provided to customers.

FIXED ASSETS AND DEPRECIATION

Tangible fixed assets are shown at original purchase cost less accumulated depreciation.

Depreciation is provided on all tangible fixed assets at rates calculated to write each asset down to its estimated residual value evenly over its expected useful life, as follows:-

Motor Vehicles	25%
Plant and Equipment	10%
Furnishings	10%

OPERATING LEASES

Rentals applicable to operating leases where substantially all of the benefits and risks of ownership remain with the lessor are charged to the statement of financial activities on a straight line basis over the lease term.

FOREIGN CURRENCY TRANSLATIONS

Monetary assets and liabilities denominated in foreign currencies are translated at the rate of exchange ruling at the balance sheet date and non monetary assets and liabilities at historical rates. Transactions in foreign currencies are recorded at the rate ruling at the date of the transaction. All differences are taken to the profit and loss account in the year in which they arise.

PENSION CONTRIBUTIONS

The Head office is a member of a multi-employer Deseret UK Benefit Plan that is of a defined benefit type and retirement benefits are payable through a separately funded UK pension scheme. The company has taken advantage of the transitional rules of FRS 17, Retirement Benefits. As the company is unable to identify its share of the underlying assets and liabilities of the scheme it is accounted for as a defined contribution scheme.

The Company participates in a multi-employer defined benefit scheme for its German branch which was acquired on 1 January 2003. The company is unable to identify its share of the German scheme's assets and liabilities and has taken advantage of the transitional rules of the FRS 17, Retirement Benefits. The company is responsible for pensionable commitments from the acquisition date and contributions to the pension scheme are charged to the profit and loss account in the year in which they are payable. Prior pensionable commitments remain with Kirche Jesu Christi der Heiligen der Letzten Tage, an Association established under German law who are obliged to fund any resulting deficiency. Accordingly the scheme is accounted for as a defined contribution scheme.

THE CHURCH OF JESUS CHRIST OF LATTER-DAY SAINTS
(EUROPEAN DISTRIBUTION) LIMITED

ACCOUNTING POLICIES

for the year ended 31 December 2004

PENSION CONTRIBUTIONS (CONTINUED)

The Company participates in a defined contribution scheme for its Swedish branch. The Company has accounted for pensionable commitments from the acquisition date and contributions to the pension scheme are charged to the profit and loss account in the year in which they are payable.

None of the employees in the Danish Branch are members of a company pension scheme.

STOCKS

Stocks are valued at the lower of cost and net realisable value. Net realisable value is based on estimated selling price less further costs expected to be incurred to completion and disposal. Provision is made for obsolete and slow-moving items.

DEFERRED TAXATION

Deferred taxation is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future, or a right to pay less tax in the future, have occurred at the balance sheet date. Deferred tax assets are only recognised when it is considered more likely than not that there will be suitable taxable profits from which the future reversal of any underlying timing differences can be deducted. Timing differences arise between the company's taxable profit and its results as stated in the financial statements. Deferred tax is measured at the tax rates that are expected to apply in the periods in which the timing differences are expected to reverse. Deferred tax is measured on an undiscounted basis.
